For all enquiries contact: Stuart Terrell on 09 520 0717 or Stuart@erich-jaeger.co.nz

Vehicle Specific: Ticked if the solution is specific to a vehicle make and model

Platform Specific: Ticked if the solution fits many models within a vehicle platform

Trailer Control: Specifies the type of trailer control module included (If applicable)

CANBUS Connect: Where on the vehicle the CANbus connection is made

Current Connect: Where on the vehicle the module power 12V connection is made

F = Front

R = Rear

F/R = Front or Rear

Check Control: Trailer Bulb-out detection

Coding Required: Ticked if coding is required for the lights to operate (CANbus only)

"-" = No Coding Required

"•" = Coding Required to enable trailer light operation

"o" = Optional, Trailer lights operate without coding. Coding activates additional comfort features.

PDC Deactivation: Ticked if rear parking sensors are automatically deactivated

Auxiliary Power: Ticked if an additional power connection is provided. (Either Constant or Voltage Regulated)

Brake Controller Prep: Ticked if a connection for a brake controller is provided. Brake signal in and service brake signal out.

Fitment Times Key:

A = Less than 30 minutes

B = 30-60 minutes

C = More than 60 minutes
